

iCREATE - INTERNATIONAL CENTRE FOR ENTREPRENEURSHIP AND TECHNOLOGY

About the Promoter

The International Centre for Entrepreneurship and Technology is established to facilitate the new age entrepreneurial pursuits of youth that focus on innovative applications for wealth generations, employment creation and global competition.

Objective

The centre is established to facilitate the new age entrepreneurial pursuits of youth that focus on innovative applications for wealth generation, employment creation, and global competition. The main objective of this project is to establish one of a kind centre related to entrepreneurship and business incubator activities.

Challenge

1. To get approval from statutory body
2. To ensure the proper development of center's infrastructure facility

Solution

1. Preparation of Projects Report

The completeness of document is the key for any approval purpose. In this case, the center required a set of document to be submitted to Statutory and Regulatory Bodies. As per requirement for the Centre establishment, Eduprogess team prepared the project report which encompasses monthly/annually progress update of the center establishment.

2. Assistance in Statutory Approvals

Once the project report completed, we provided assistance to the promoter for statutory approval related procedures at regular intervals.

3. Hand-holding Facilitating Support

As the main challenge is to ensure the proper development of center's infrastructure facility, Eduprogess provided hand-holding support in Coordinating and Facilitating for the center operationalization.

Result

The International Centre for Entrepreneurship and Technology has fully established in 2015. The center has implementing various training program and activities related to business incubators.
